

## Job Sheet

Client site:	Mansfield
Site contact:	Mark
Date of job:	2024-11-12
Days on site:	1
Engineer on site:	Matt, Andy and Matty
Type of job:	installation
Number of cameras:	5

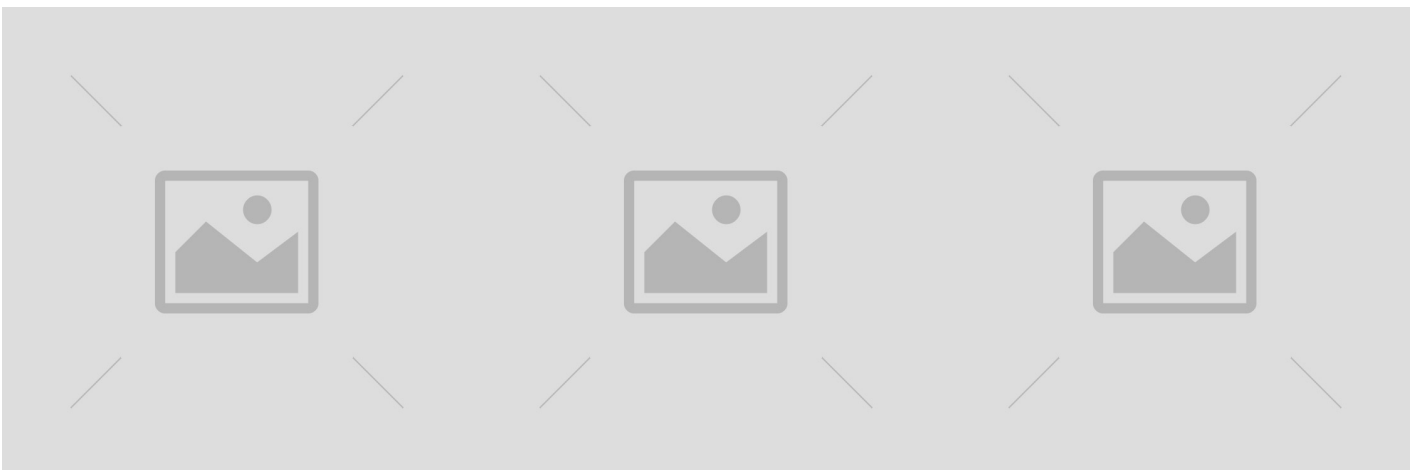

Currently there are 5 cameras covering the outside of the premises, this consists of 2 cameras across the front elevation, 2 cameras on the reception elevation and 1 camera on the rear elevation. Unlike the other sites the lighting here is excellent and therefore there is no need for the Hybrid cameras and instead we can use the standard Hikvision AI Acusense 8MP IR Turret Cameras with a 40m Infrared Range and 2.8mm lens, these will be located as follows 18 September 2024 at 07:34 1.) Front elevation left corner, this camera will be replaced however it needs to be relocated above the lighting and will provide an overview of the front containers and yard area 2.) Front elevation right corner, this camera will be replaced and will provide an overview of the main entrance 3 and 4.) Reception elevation, these cameras will be relocated from the end of the building to the centre of the building with the right camera pointing to the left and left camera pointing to the right to provide an overview of the area, the right camera will be positioned in line with where the new containers will be positioned to provide coverage of the aisle between the containers. Internal Cameras 5.) Rear Elevation, this camera will be replaced however it needs to be relocated above the lighting and will provide an overview of the rear containers and yard area.
