The HVR is to be located in the front porch.

Recorder Location Image

Installation instructions:

We will install six Hikvision 8MP 4K TVI ColorVu Turret Cameras in the following locations. 1 camera will be installed to provide coverage of the rear door. 1 camera will be installed to provide coverage of the stables. 1 camera will be installed to provide coverage of the parking spaces at the side of the property. 1 camera will be installed to provide coverage of the paddocks / fields. 1 camera will be installed to provide coverage of the garden to the left of the property. 1 camera will be installed to provide coverage of the front door and gate to the field. The cameras have built in IR with LED lights that will illuminate on motion when someone enters the set areas providing a full colour image at night. All of the above cameras will be wired back to a Hikvision 8 channel HVR with 2TB hard drive that will be located in the porch area and the system will be housed in a lockable data cabinet, this will ensure there are no unsightly cables on show and everything will be neat and tidy. We will install two Hikvision 8MP 4K Hybrid ColorVu and IR Acusense Turrets on the tractor shed to provide coverage of the tractor shed and driveway, The cameras will be connected to the Hikvision 8 channel HVR with 2TB hard drive using wireless transmitters.
