To be confirmed by Dan on the day.

**Recorder Location Image**

Installation instructions:

Internal cameras We will install 12 HikVision 8MP HD Turret Cameras with a 2.8mm lens with a 30m IR range to provide coverage of the areas as I have marked up on the internal floor plans. External cameras and horn speaker We will install 4 Hikvision 8MP 4K Hybrid ColorVu and IR Acusense Turrets to provide coverage of the external areas marked on the external plan, The cameras have AI built in and we will utilize this to provide accurate notifications when there are any unwanted visitors on site. The cameras have built in IR with LED lights that will illuminate on motion when someone enters the set areas providing a full colour image at night. There will be one horn speaker located externally on the building and this will enable you to warn off any unwanted visitors. System There will be a lockable network cabinet that will house the Hikvision HVR 16 channel 8TB with built in acusense that will provide a minimum of 30 days of footage and a 4 port PoE network switch to provide power and data for the cameras. The Hikvision HVR 16 channel 8TB with built in acusense will be connected to your existing broadband and this will enable you to use the app for live view and playback.

Additional Information:

run a data cable for the access control that is to be installed by us.
