Installation instructions:

We will supply and install six Hikvision 8MP 4K Hybrid ColorVu and IR Acusense Turrets to provide coverage as marked on the attached plan, The cameras have AI built in and we will utilize this to provide accurate notifications when there are any unwanted visitors on site. The cameras have built in white light technology that enables the cameras to provide a full colour image at night rather than the conventional grey scale images. I have attached a spec sheet for the cameras for you to have a look at. The Hikvision 8MP 4K Hybrid ColorVu and IR Acusense Turrets will be mounted on container poles and they will be connected to a 8 port PoE network switch using Cat5 cable that will provide power and data for the cameras. We will supply and install a Hikvision 2MP IP DeepInView LPR Bullet 2.8-12mm (ANPR) camera that will be mounted on a container pole to provide coverage as marked on the attached plan. There will be a horn speaker located on a container pole as per plan and this will enable you to warn off any unwanted visitors, this would be a requirement for the site to be monitored should you wish to go down the monitoring route. There will be a Hikvision NVR 8 channel 2TB with built in acusense that will provide a minimum of 30 days of footage. The Hikvision NVR 8 channel 2TB with built in acusense will be connected to a 4G router (Sim card to be provided by yourself) that will enable you to view playback and live images on the app, this will also enable the system to send out alerts to the monitoring station. Please note If you are to go down the monitored route you will require a static IP address for the monitoring station to access the system, this can be done with a static IP address sim card or a connect my CCTV box that most monitoring stations can include with your monitoring package. Equipment breakdown 6 x Hikvision 8MP 4K Hybrid ColorVu and IR Acusense Turret. 1 x Hikvision 2MP IP DeepInView LPR Bullet 2.8-12mm (ANPR) 1 x Hikvision NVR 8 channel 2TB with built in Acusense. 1 x 8 port PoE managed network switch. 7 x Hikvision deep bases. 1 x Horn speaker with built in amp. 7 x Container poles. 1 x Installation cost including CAT5
