Recorder Location Image

Phase 1 There will be three Hikvision 8MP 4K Hybrid ColorVu and IR Acusense Turrets and three Hikvision 8MP 4K Panovu 180 Acusense Turrets mounted on container poles to provide coverage as marked on the plan, The cameras have AI built in and we will utilize this to provide accurate notifications when there are any unwanted visitors on site. Both cameras have built in white light technology that enables the cameras to provide a full colour image at night rather than the conventional grey scale images. I have attached a spec sheet for both cameras for you to have a look at and below is a link to a video so you can see the image quality on the Panovu cameras you can jump to 11.50 to save time.

Installation instructions:

6g There will be a horn speaker located on a container pole as per plan and this will enable you to warn off any unwanted visitors. There will be a Hikvision NVR 16 channel 8TB with built in acusense that will provide a minimum of 30 days of footage, The system will be connected to your router that will enable you to view playback and live images on the app. The cameras will be powered by a 16 port PoE network switch and connected to the NVR (Please note ducting will be required to ensure we are able to get cable to each camera location, This is not included in the proposal.)

Equipment breakdown 3 x Hikvision 8MP 4K Panovu 180 Acusense Turret. 3 x Hikvision 8MP 4K Hybrid ColorVu and IR Acusense Turret. 1 x Hikvision NVR 16 channel 8TB with built in Acusense. 6 x Hikvision deep bases. 1 x Horn speaker with built in amp. 5 x Container poles.
